## Custom Built one of a kind Reverse Trike - \$19000 (Salt Lake City)

image 1 of 16

\$19000 OBO will trade for NICE Fifth Wheel Camper 92 and Newer with at least 1 slide but we would like 2 slides must be in Excellent condition size should be from 27'-38' fiberglass sides is better but I will consider what you have.

I'm a master Fabricator, I have over 25 years of hands on fabrication experience. The project that I have been working on for the last year is my last "Wow" build! Back in 2002 I built 2 of these units for myself that looked very closely to my current build but I did not build or make any more of these, both units were powered by the Harley Evo Motors. This unit is running a Hayabusa 1300R 180+ Hp motor. My power the weight ratio is more than OUT STANDING 935lbs with fuel and a 180hp motor you do the math. I was personally about to do a startup company Called "Omega Engineering & Fabrication inc" I put my RT on hold and I have tried in the last few months or so to light the fire and drive again but due to my job and its demands, and just lift getting in the way I just need to sell this RT and let somebody else do what I almost did. My RT right now is 98% complete and the following items that still need to be done are listed. There are

only minor things that need to be do like the following items, 1) Hook up the S/S brake line I just received them 2) Have a Master Pivot bolt for the swing arm made it needs to be 1" machined steel 3) Hook up the external fuel pump installed and have 4) Add the tac and speedo I don't have 5) Install the chain don't have 6) Wire the bike it has the full Hayabusa wiring harness and brain box NOTHING has been cut or deleted. 7) Install the battery I don't have. OK now I have lot of photos for the DMV to prove I built it from NOTHING. The GRAY plugs or parts you see are "plugs" this is what you need to make a fiberglass mold from. "YEP" I do everything I designed it, I cut and welded everything. I hand sculpted the body glassed it and made them ready to go in to "MOLDING" If you have any questions please call me at [show contact info](#) I live in Salt Lake City UT.

## WHAT YOUR GETTING

Complete rolling chassis as seen in photos current as of 4-18-2016
